## DETAILED ACTION

### *Amendment/Response to Election/Restriction*

1. Applicant's election without traverse of Group II, claims 5-7, in the reply filed on 25 October 2007 is acknowledged. Claims 1-4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 25 October 2007.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims have indefinite terms such as "color tone(s)" which "makes/make", "user's terminal device(s) is/are operable" which renders the claims indefinite since it is not known if there is a plurality of components or not. Please clarify.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section

351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Lahti et al. (U.S. Patent No. 6,973,626, from hereinafter "Lahti").

Lahti teaches a system for automatically generating graphical user interface elements at a client system according to a current configuration model. Regarding claims 5-7, as best understood by applicant, Lahti teaches a web-based communication system that utilizes hidden image data when it discloses that client system 12 includes a web browser 20 that receives web pages 18 from server system 14, displays viewable frames of web pages 18 to one or more users of client system 12, supports "hidden" or other unviewable portions of web pages 18, and executes code associated with web pages 18 as appropriate during operation of system 10. Server system 14 includes components suitable to generate, render, and communicate web pages 18 containing product configuration content from the server system 14 to client system 12, in the form of Hypertext Markup Language (HTML) pages, Extensible Markup Language (XML) pages, or in any other appropriate web-based format. Although web pages 18 are primarily described, the present invention contemplates any suitable page, file, document, or other data representation. Where appropriate, reference to a web page 18 is intended to encompass all suitable data representations and should not be construed to limit the scope of the invention to a particular data representation. Furthermore, reference to web page 18 or a viewable frame of a web page 18 is intended, where appropriate, to include the displayed image of web page 18 (in a browser window of

client system 12 for example) in addition to underlying HTML, XML, or other code used in generating the displayed image of web page 18 (see Figure 1, col 3, lines 35-57).
